Junior Sports Camp

The Greens Report

The weather in June was great for growing Bermuda, with the night time temperatures in the low 70s and the day time temperatures in the upper 80s. The transition from the rye overseed back to Bermuda is still on going.

The temperatures during the spring made for a challenging transition. We had a few areas, especially several fairways, that were slow to come back.

July aerification on the fairways, tees, and approaches:

- *July 30th – August 3rd*

The second greens aerification:

- *July 23rd and 24th*

These cultural practices are a major part of our overall program for the healthiest turf and best playing conditions possilble.

We will start the month mowing the rough height at 1", and by the end of the month the height will be 1.25".

So far this year the rough has been healthy and growing vigorously. We are trying to keep the height at a manageable/playable level.

If you ever have any questions or concerns about the golf course or grass in general, please ask.
See you on the course!

Alex Tolbert
Greens Superintendent
